

OIL RADISH (*RAPHANUS SATIVUS*)

OCTOPUS

The advantages of OCTOPUS

› Oil radish has its main importance as a fast-growing green manure plant. It develops a taproot and a well-branched secondary root system and is thus able to effectively use available nutrients and soil water from deep soil layers.

Variety assessment of OCTOPUS

Mass growth at the beginning		strong
Tendency to lodging		low to medium
Tendency to blooming	- no assessment -	
Susceptibility to heterodera schachtii		resistant

(1 = very low, very early / 9 = very strong, very high, very late; Susceptibility to heterodera schachtii 1-3 = resistant)
