

PERENNIAL RYEGRASS (*LOLIUM PERENNE*)

ABERAVON

Ploidie: diploid

Maturity group: late (7)

Listing: since 2005

Advantages of ABERAVON

- › HSG - High Sugar Grass
- › High concentrations of water soluble carbohydrates produce increased milk yields and live weight gain through improved digestibility
- › Low susceptibility to rust

Variety assessment of ABERAVON

Mass growth at the beginning		low to medium
Tendency to winter kill		medium
Tendency to lodging		medium to high
Susceptibility to rust		low to medium
Persistence		medium to high
Sward density		medium
Dry matter yield, total		medium
Dry matter yield, 1st cut		high
Dry matter yield, further cuts		low to medium

(1 = very low, very early / 9 = very strong, very high, very late)

Source: according to the specifying variety list 2024 issued by the Bundessortenamt

Variety descriptions above are provided to the best of our knowledge. Despite all efforts, SAATZUCHT STEINACH GmbH & Co KG cannot guarantee repeatability of described assessments in any case. The presented results should provide an appropriate knowledge base for decision support and may not be an indicator of results you may obtain in your individual location, as local growing conditions, including soil type and weather may vary. SAATZUCHT STEINACH GmbH & Co KG excludes all liability for damages which may arise from use of this variety description.
