PHACELIA (*PHACELIA TANACETIFOLIA*)

BORATUS

The advantages of BORATUS

› A quick growing variety that can be sown late and that is neutral to turnip nematodes.
Quick early development and good soil shading make it an ideal green manure crop as well as for mulch sowing in the spring. Reliable winter kill ensures no problems with volunteers.

Variety assessment of BORATUS

Mass growth at the beginning	6	medium to strong
Tendency to lodging	5	medium
Tendency to blooming	5	medium

(1 = very low, very early / 9 = very strong, very high, very late)
Source: according to the specifying variety list 2026 issued by the Bundessortenamt

Variety descriptions above are provided to the best of our knowledge. Despite all efforts, SAATZUCHT STEINACH GmbH & Co KG cannot guarantee repeatability of described assessments in any case. The presented results should provide an appropriate knowledge base for decision support and may not be an indicator of results you may obtain in your individual location, as local growing conditions, including soil type and weather may vary. SAATZUCHT STEINACH GmbH & Co KG excludes all liability for damages which may arise from use of this variety description.
